BENTO IKURA FILLER

SEMI-AUTOMATIC FILLING STATION

Designed specifically for the rugged fish plant environment.

The **BENTO IKURA FILLER** is specifically designed to operate with automated Ikura draining equipment. This model is sized to be compatible with the NIKKO NMI-500 and features a storage area so that the NIKKO machine can continue to operate while either 1000-gram or 500-gram Bento boxes are filled and leveled.

- * **Different patterns for different size containers can be ordered.**
- * **Machine is made of all stainless steel and plastic components.**
- * **Machine can be completely and conveniently disassembled for cleaning without the use of tools.**

NEPTUNE DYNAMICS LIMITED

ENGINEERING, MACHINERY DEVELOPMENT, SALES & SERVICE SINCE 1975

#180-6751 Graybar Rd., Richmond, B.C., Canada, V6W 1H3

Phone: (604) 244-9836 Fax (604) 244-9771 email@neptunedyn.com

Semi-Automatic Filling Station.

The **BENTO IKURA FILLER** delivers the accumulated Ikura to the forward Bento boxes, retracts to the second filling station and then retracts to the storage area. A single momentary contact push button recycles the next four Bento boxes.

Requirements:

- 1 CFM @ 50 psi air
- 3 amp @ 120VAC/60Hz electrical
- 2 GPM @ 60 psi water

28 YEARS OF SOLUTIONS!

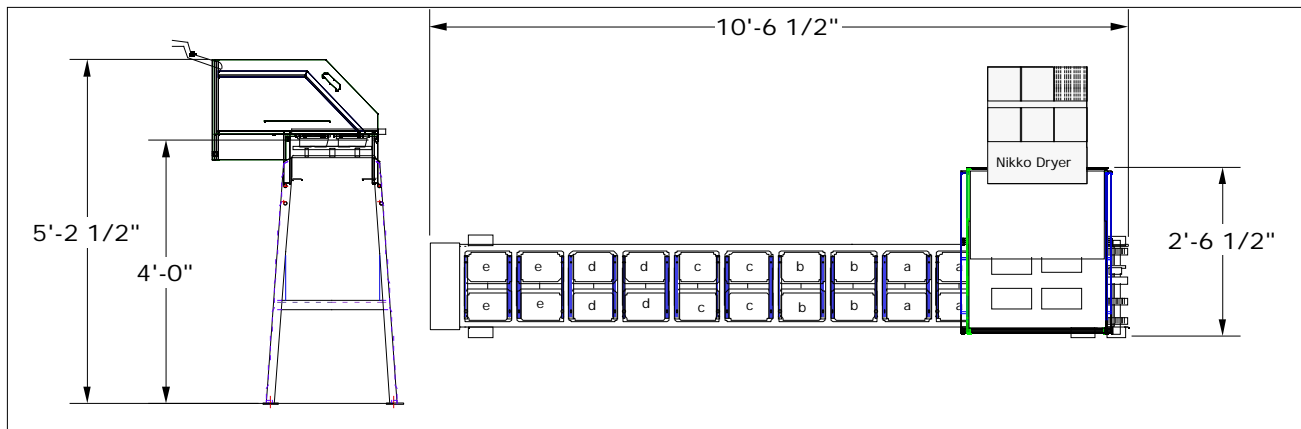

Neptune Dynamics Limited was established in 1975 to develop and manufacture sorting equipment for the Roe Herring Industry. Neptune has branched out to other industrial sectors while maintaining its close relationship with the fish processing industry.

Neptune has several established products which are manufactured and serviced in our modern, well-equipped Richmond facility. These include:

- **HD1SU**—a sex sorting machine for the roe herring industry, with machines currently operating in British Columbia, Eastern Canada, Ireland, Scotland, Japan and Europe.
- **RHO**—an attachment for the HD1SU—this machine automatically opens the herring and extracts the roe without damage.
- **CCS**—a quality assurance, can integrity measurement and sorting system developed for the canning industry, with units in operation in B.C., USA, Thailand and Mainland China.
- **OTTO**—an AutoFeeder for the HD1SU, RHO and head cutting machines. 300 fish per minute with one or two operators with herring, sardines or hake.
- **SIZE GRADER**—Neptune Rotating Tube Size Grader delivers high quantities of accurate and gentle grading of fish.

SALES & SERVICE:

- **NIKKO** Ikura Processing Machines from Japan.
- **RAMSEY ICORE** Checkweighers & Metal Detectors.
- **MUELLER** Heat Exchangers.
